

## **Sidewalks installation begins in Phase 2**

**150 feet of new sidewalk poured on the roadway's  
east side from Magnolia to Eldorado**

Sidewalk installation began this week in the section from Magnolia Avenue to Eldorado Street. The new sidewalk is 8 feet wide, compared to the old sidewalk which was 4 to 6 feet. The new pedestrian-friendly surface features a decorative window pane pattern and when installation is complete, will be fully ADA compliant. It will take several weeks for the concrete to cure.

Also this week, the project's electrical contractor began installing underground conduit for the roadway's decorative street lights, which will be comparable to the existing street lights along Orange Avenue.

All businesses along MLK are accessible to pedestrians. The area has detour signage, as well as signs for the businesses. Customers can park temporarily in the right-of-way on the side streets.

Pedestrians should not walk through the work area. If walking around the work site perimeter, pedestrians are urged to use caution.
