

THE CITY OF DAYTONA BEACH

Board of Adjustment

VARIANCE APPLICATION

PURPOSE

The purpose of a Variance is to allow certain deviations from the dimensional standards in the City's Land Development Code (such as height, yard setback, lot coverage, or similar numerical standards) when the landowner demonstrates that, owing to special circumstances or conditions beyond the landowner's control (such as exceptional topographical conditions or the narrowness, shallowness, or shape of a specific parcel of land), a literal application of the standards would result in undue and unique hardship to the landowner and the deviation would not be contrary to the public interest. Variances are to be exercised only in rare instances, and under exceptional circumstances to relieve undue and unique hardships to the landowner. ***No change in permitted uses or maximum densities may be authorized by variance.***

SUPPLEMENTAL INFORMATION

The purpose of a Variance is to allow certain deviations from the dimensional standards in the City's Land Development Code (such as height, yard setback, lot coverage, or similar numerical standards) when the landowner demonstrates that, owing to special circumstances or conditions beyond the landowner's control (such as exceptional topographical conditions or the narrowness, shallowness, or shape of a specific parcel of land), a literal application of the standards would result in undue and unique hardship to the landowner and the deviation would not be contrary to the public interest. Variances are to be exercised only in rare instances, and under exceptional circumstances to relieve undue and unique hardships to the landowner. No change in permitted uses or maximum densities may be authorized by variance.

Article 3, Section 3.4(V) of the Land Development Code reads as follows:

a. A Variance application shall be approved only on a finding there is competent substantial evidence in the record of the public hearing, that all of the following standards are met:

i. What extraordinary and exceptional conditions exist (such as topographic conditions, narrowness, shallowness, or the shape of the parcel of land) pertaining to the particular land or structure for which the Variance is sought, that do not generally apply to other lands or structures in the vicinity?

ii. What extraordinary and exceptional conditions exist that are not the result of the actions of the property owner?

iii. Because of those extraordinary and exceptional conditions, the application of this Code to the land or structure for which the Variance is sought would effectively prohibit or unreasonably restrict the utilization of the land or structure and result in unnecessary and undue hardship.

iv. The Variance would not confer any special privilege(s) on the property owner that is denied to other lands or structures that are similarly situated.

v. Will the variance granted be the minimum variance that will make possible the reasonable use of the land, building or structure?

vi. The Variance is in harmony with the general purpose and intent of this Code and preserves its spirit.

vii. The Variance would not adversely affect the health or safety of persons residing or working in the neighborhood, be injurious to property or improvements in the neighborhood, or otherwise be detrimental to the public welfare.

viii. The Variance is consistent with the Comprehensive Plan.
